Workshop
Geometry and Physics of Spatial Random Systems
July 26 - July 29, 2011
Bad Herrenalb, Germany
http://gpsrs2011.math.kit.edu

The conference marks the beginning of a new research group “Geometry and Physics of Spatial Random Systems”, funded by the German Science Foundation (DFG).

The workshop focuses on new trends and developments in stochastic geometry and on conceptual relationships between geometric and physical properties of spatially structured matter, such as granular media and liquid foams.

Keynote Speakers:

Semyon Alesker (Tel Aviv)
Gary Delaney (Melbourne)
Markus Kiderlen (Aarhus)
Andrew Kraynik (Albuquerque)
Giovanni Peccati (Luxembourg)
Mathew Penrose (Bath)

Organizers:
Daniel Hug (Karlsruhe)
Eva B. Vedel Jensen (Aarhus)
Günter Last (Karlsruhe)
Klaus Mecke (Erlangen-Nürnberg)
Gerd Schröder-Turk (Erlangen-Nürnberg)
