Projektorientiertes Softwarepraktikum

Informations on the practical course in the summer semester 2020

For students who are interested in participating in the practical course in the summer semester 2020, 2 possibilities are presented below. Option 2 is an alternative in case of technical difficulties (e.g.: no own computer/laptop, existing problems with the installation of software, further personal support is necessary).

Option 1: Attend the practical course this semester (online course)

The dates, Tuesdays and Fridays from 09:45-11:15 a.m., will take place online via Microsoft Teams.

- Phase I, theoretical part (April 21 and 24):
 - The lecture slides are available in ILIAS, latest at the beginning of the lecture period on April 20th.
 - After the online lecture, questions will be answered (with all participants or in small groups).
 - The questions and answers can be made available in ILIAS for all participants if wanted/suitable.
- Phase II, exercises (April 28 to May 26):
 - The exercise material will be available in ILIAS, not later than at the start of phase II
 - Following the exercise introduction, general questions are answered.
 - In the remaining part of the sessions, students can work on the current exercises and ask specific questions about them.
 - The submission of the exercise reports will take place at the end of Phase II.
- Phase III, projects (May 29 to July 24):
 - The material (project selection) will be available in ILIAS, at the latest one week before the start of the project phase.
 - The project work (in groups) will take place online in Microsoft teams on the agreed dates.
 - Contact to the respective supervisor can be made by mail or by appointment in the group chat in Microsoft Teams.
 - Final presentations of the results take place online in Microsoft teams and are discussed afterwards.
 - The submission of the project reports will take place as at the end of phase III.

Option 2: Attend the practical course next year (summer semester 2021)

Further Information

- All course material is exclusively provided in ILIAS. All course dates/meetings take place in Microsoft teams.
- Registered participants will be invited to the course's group in Microsoft Teams by the administrator until April 20.
- A detailed installation guide for Microsoft Teams can be found at <https://www.scc.kit.edu/dienste/ms-teams.php>. The most important steps are:
 1. Agreeing to the privacy policy for the use of Microsoft Teams at <https://my.scc.kit.edu/shib/azurefreigabe.php> (A short waiting period is possible!)
 2. In the browser login with KIT e-mail at <https://teams.microsoft.com>
 3. Alternatively, download of Microsoft Teams as a standalone program at <https://products.office.com/en-us/microsoft-teams/download-app> and login with KIT e-mail
- Information and course contents can be found in ILIAS under **Repository / Organisationseinheiten / Fakultät für Mathematik / SS 2020 / Projectorientiertes Softwarepraktikum**, or via direct link at https://ilias.studium.kit.edu/goto.php?target=crs_1104826.
- Please always check the instructions on the [website of the course](#) and in ILIAS.
- If you have any questions, please contact stephan.simonis@kit.edu.
- In case the realization of the practical course at the mathematics building is possible again at a future date, we will inform you via ILIAS or by e-mail about the further procedure.
